Purpose of this Guide

This guide is intended to describe STARS trading partner code requirements. Trading partner codes are required for quarterly and year-end reporting of intragovernmental (between Federal agencies) and intra-agency (within DOE) revenues, costs, transfers, investments, receivables, other assets, payables, debt, deferred revenues and other liabilities. Trading partner codes enable the Department to classify its financial statement line items as either intragovernmental or public and to identify intra-DOE balances for elimination. Similarly, DOE's quarterly and year-end trading partner reports to Treasury identify intragovernmental balances for elimination in the Government-wide financial statements.

The Department's more significant intragovernmental transactions with other Federal agencies include revenues and related receivables for reimbursable work (note that it's the revenues that are intragovernmental and not the related reimbursable work costs which are generally incurred through direct salary, contract and subcontractor charges, or indirect non-Federal costs), transfers of oil from the Department of the Interior to the Strategic Petroleum Reserves, investments in Treasury securities, and debt and appropriations transfers related to certain funding of the power marketing administrations.

Trading partner codes are established by Treasury and depending on the specific reporting requirement can be either 2 or 4 digits. (Treasury requirements for trading partner codes are evolving and a further future expansion of the codes is likely.) The official list of trading partner codes is published by Treasury in the TFM and can be found at the following website: http://www.fms.treas.gov/factsi/vol1/vol1appen5.doc. This list is also reproduced as Appendix 1 of this guide.

The Department also has significant intra-office transactions that require DOE's specific trading partner code (89) in order to generate elimination entries. These include certain transfers of funding between appropriation accounts, intra-office transfers of property and inventories, intra-office receivables and payables, and intra-office revenues and costs. Periodic intra-office reconciliations should ensure that reciprocal account balances between offices are in agreement. In addition to using the DOE (89) trading partner code, all intra-office transactions should include an Other Party Identifier (OPI) code in the DFF values, if possible, to facilitate these reconciliations between offices/integrated contractors

Trading Partner Function

STARS reports containing trading partner code data are generated from the General Ledger module. DOE developed a custom Trading Partner Function to meet trading partner code reporting requirements. This function uses the process depicted in Table A to identify trading partner code values for all general ledger reports.

The trading partner function is highly dependent on the set-up of each SGL account on the FACTS Attributes Form maintained by the EFASC Systems Team. Each SGL account is designated as one of the following on this setup form:

F – SGL balance is always Federal

Y – SGL balance can be either Federal of non-Federal

N – SGL balance is always non-Federal

Supplier/Customer Tables

For each new Federal Entity added to the STARS supplier and customer tables, the End User navigates to the correct data entry window and selects the Classification Type of 'FEDERAL'. The trading partner DFF is required for all Federal suppliers and customers and the End User must enter a 2 byte Trading Partner code by selecting from the list of values (LOV). Questions concerning the correct trading partner code should be directed to the site's STARS superuser, or alternatively to Marion Hoch at marion.hoch@hq.doe.gov or (301) 903-4216.

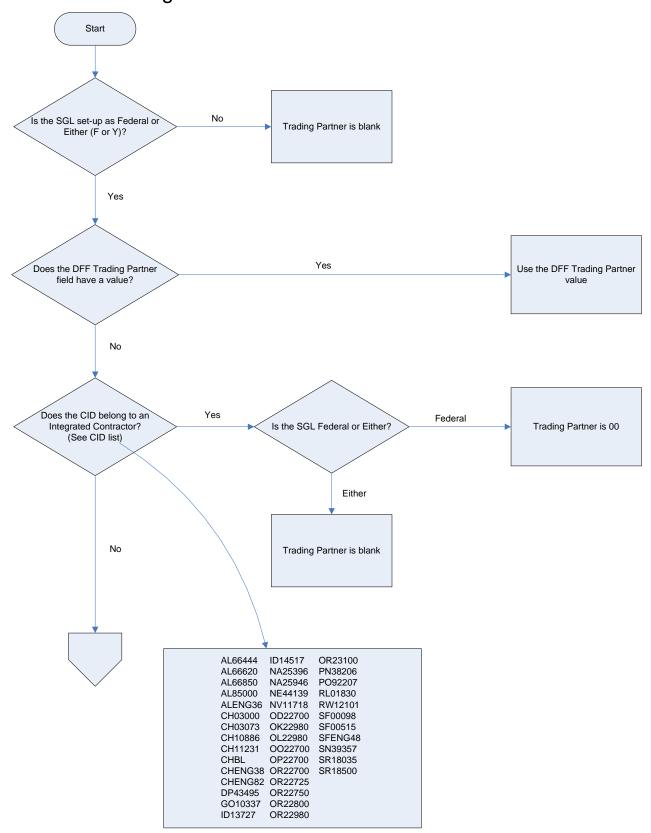

Integrated Contractor Interface

The Department's integrated contractors are required to supply an appropriate OPI value for inter/intra-office and inter-agency cost, revenue, transfer, receivable, and payable balances in their monthly data files uploads to STARS. The integrated contractor interface posts all transactions, except those associated with funded cost SGLs (61000000, 6500F000, 88020100, 88020200, 88020300, and 1990B700) directly to the GL. The integrated contractor interface generates the appropriate DFF trading partner value for these direct GL entries using the OPI/Trading Partner Table in STARS¹. Funded cost SGL transactions are processed through the PO and the AP modules, and the appropriate GL DFF trading partner code values are again generated from the integrated contractors' OPI data using the OPI/Trading Partner Table in STARS when these transactions are posted to the GL.

_

¹ If the OPI exists in the crosswalk table the Trading Partner is set based on the value in the table. If the OPI begins with alpha character it is set to "89". If it is numeric and doesn't exist in the table it is set to blank. Therefore, the Trading Partner Code DFF value is only set if an OPI exists.

No

Quarterly/Year-end Requirements for Trading Partner Code Reporting, Analysis, and Confirmations

Headquarters Reporting

At the HQs level, the following reporting requirements involve use of the trading partner code data in STARS:

- At the end of each quarter, the Department submits an intragovernmental FACTS I file to Treasury. This file is used by Treasury to compare DOE's reported balances by reciprocal SGL account combinations to those of other agencies. For example, DOE's accounts receivables with other agencies are compared to accounts payable owed to DOE reported by other agencies using DOE's trading partner code. Treasury generates a Material Status of Disposition Report identifying material discrepancies between DOE and other agencies by reciprocal SGL category. These differences are investigated to identify if the cause is due to different accounting treatment between the respective agencies or a reporting error by either agency.
- The Department is required to include intragovernmental balances by agency in certain footnotes reported to Treasury in the Year-End Closing Package.

Field Office/Integrated Contractor Analysis of Intragovernmental Balances

At the field office level, analysis of trading partner code data is routinely performed through the following:

- Identifying and resolving abnormal intragovernmental balances at the trading partner DFF level utilizing the following report:
 - o DOE Abnormal Balances Report (CSV output)
- A review of trading partner exceptions using the report:
 - o DOE Trading Partner FACTS 1 Exception Report FACTS 1
- Reviews of trading partner variances by using the following reports:
 - DOE Trial Balance of Trading Partner Variances by Fed Reimb WFO (CSV output)
 - o DOE Accounts Payable Trading Partner Variances Report (CSV output)
- An analytical review of significant account balance changes using the report:
 - o DOE Trial Balance w/Smart CID and TP Logic (CSV output)
- Periodic reconciliations of integrated contractor trial balances at the trading partner/OPI DFF level

Offices will also find the following reports useful in analyzing trading partner data:

- <u>DOE AR Customer Trading Partner by Customer ID Report</u> enables users to look up the customer for transactions posted to GL from the AR module where the Attribute 7 field is populated in GL and is used to link to the customer record.
- <u>DOE AR Customer Trading Partner by WFO Report</u> enables users to look up the supplier/trading partner assigned to a particular WFO value or range of values.

• <u>DOE GL Journal Detail Report (Revised) (CSV output)</u> – Enables users to identify the specific transactions in the GL that comprise a trail balance amount for a specific trading partner or without specifying a specific trading partner parameter.

Field Office/Integrated Contractor Analysis and Confirmations of Inter-Office Balances

The 25th of each month is the Department-wide cutoff for integrated contractors to bill other integrated contractors for inter-entity work and for issuing property and inventory transfers. Each organization preparing transfer vouchers should, in accordance with the Accounting Handbook Chapter 12, Inter-Entity Transactions, confirm all transfers made during September with the organization receiving the transfer voucher by telephone or email as soon as possible consistent with year-end closing instructions.

Allottees and their integrated contractors must also perform confirmations of material interoffice balances to ensure there are no significant differences at the end of the third quarter and at year-end. Allottees are required to use the DOE Confirmation of Inter-Office Balances (CSV output) report as of May and August months-end to compare interoffice balances with the reciprocal balances reported within and by other allottees:

Any significant differences should be resolved prior to the June 25th and September 25th cutoffs for billings and transfers. Offices are encouraged to use the standard confirmation format when requesting confirmations of material balances from another office which can be found at http://www.cfo.doe.gov/Cf11/Frad/Inter-OfficeTransferForm.xls.

In addition, each allottee will prepare a final year-end reconciliation of interoffice balances using the STARS confirmation report. Significant differences for this final reconciliation must be resolved or brought to the attention of the Director, Financial Reporting and Analysis Division, for resolution by the date stipulated in the annual Year-End Financial Statement/Closing Guidance.

The confirmation report compares the balances for the allottee requesting the report (Allottee Net Amount) to the balances reported by all other allottees using an OPI belonging to the requesting allottee (Reciprocal Allottee Amount). The report groups SGL accounts into either "Real" or "Nominal" reciprocal categories to facilitate the reconciliation between accounts that would normally offset one another. The reports generate a CSV output file that must be exported to Excel and a pivot table created. An example of a confirmation report is provided in Table 1. (Note that there are additional data elements available on this report to facilitate analysis of the balances at lower levels of detail.)

Balances at the OPI Allottee summary level should be offsetting between the Sum of Allottee Net Amount and the Sum of Reciprocal Net Amount. Material differences must be resolved between the respective offices for each reciprocal category. Materiality, for purposes of interoffice confirmations, is defined as differences at the reciprocal category exceeding \$1,000,000. Offices should exercise their discretion in expending resources to reconcile below the materiality threshold as it is not required for satisfying Departmental reporting requirements. However, offices should be responsive to requests for assistance from reciprocal offices that are also trying to meet the \$1,000,000 threshold where problems are due to differences with individual allottees that are below the \$1,000,000 threshold. Also, the National Nuclear Security Agency Service Center may require a lower dollar materiality threshold for reconciliations of nuclear material transfers.

Inter-Entity Balances

Inter-entity work results in receivable and payable real account balances that require eliminations in DOE's consolidated financial statements. The DOE policy for inter-entity work is contained in Chapter 12 of the DOE Accounting Handbook and specific accounting entries for inter-entity work between integrated contractors are prescribed in this policy. The specific accounting transactions associated with inter-entity work orders between DOE field offices, DOE field offices and integrated contractors, and shared services are identified in Appendix 4 of this guide. Reconciliations of the inter-entity receivables in Fund 00911 and payables in the authorizing offices' funds is an important step to ensure that Headquarters can prepare elimination entries for these reciprocal offsetting real account balances.

Conversely, the accounting entries for enter-entity work result in net zero nominal revenue balances and net zero nominal cost balances in Fund 00911, except when timing differences occur between when the inter-entity costs are incurred by the performing office and when they are billed to the authorizing office. For inter-entity work funded through the 00911 fund and are billed by EFASC, any year-end timing differences for unbilled costs are adjusted through an accrual entry that results in a debit to unbilled receivables with an offset credit to costs, effectively zeroing out any such timing difference for financial statement reporting purposes. Therefore, no nominal account elimination entries are required for these inter-entity activities.

Since nominal enter-entity funded SGL account eliminations are not required, the DOE Confirmation of Inter-Office Balances (CSV output) report is designed to exclude this revenue and expense interoffice activity. Revenues in the 00911 are excluded as are costs associated with authorizing office purchase orders. Authorizing office CIDs are identified through the STARS value set DOE_AUTH_OFFICE_PO. Offices entering WFO values for enter-entity work will need to update this value set as POs funding the enter-entity work are established. Instructions for updating this STARS value set are included as Appendix 5 of this guide.

Elimination Entries

Elimination entries are prepared by The Office of Finance and Accounting for quarterly and year-end financial statements purposes based on SGL account balances with DOE's trading partner code. Reconciliations of trading partner 89 data between offices are necessary to ensure there are no material differences that would adversely impact the ability to prepare these elimination entries. The elimination entries include the following:

- 1. NWF Deferred Revenues
- 2. D&D Fund Support Costs
- 3. Working Capital Fund Revenues
- 4. Isotope Program Support Costs
- 5. PMA Power Sales/Purchases with DOE Labs
- 6. Non-WCF Advances
- 7. Undistributed IPACS
- 8. Inter-Entity Work Receivables and Payables
- 9. Other Inter-Office Accounts Receivables/Payables

Summary

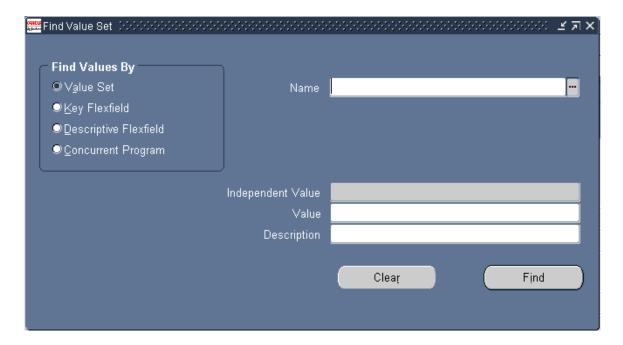

This document will provide step-by-step instructions including screenshots on how to modify the DOE_AUTH_OFFICE_PO Value Set in STARS. The user can either insert or end-date a PO value in the DOE_AUTH_OFFICE_PO Value Set.

Field offices responsible for establishing their own WFO values will need to update the DOE_AUTH_OFFICE_PO Value Set in STARS when establishing a PO to fund inter-entity work as the authorizing office. EFASC will update this value set for those offices for which it maintains responsibility for WFO value set-ups.

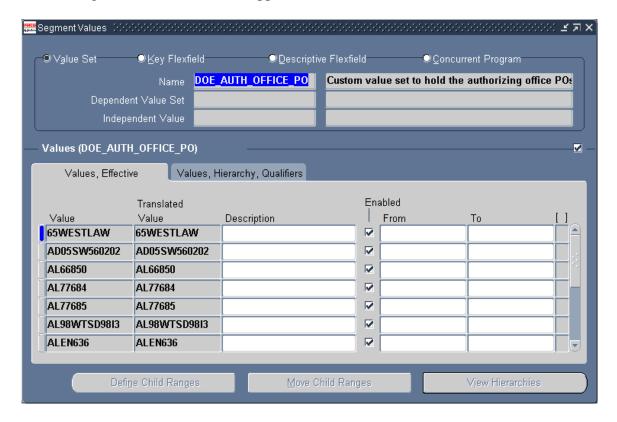

- Log into Oracle Applications and switch to the DOE GL Values responsibility.
- Next, drill down to Setup->Financials->Flexfields->Validation->Values (as shown below):

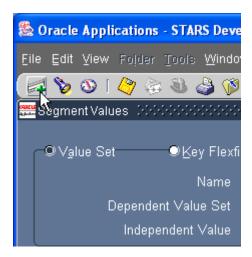

• The Find Value Set Form will appear (as shown below):

- In the Name field, type in: DOE_AUTH_OFFICE_PO
- Next, click on the Find button.
- The Segment Values Form will appear (as shown below):

• You can insert a new record by clicking on the New icon (as shown below):

- There are three ways to end-date a value:
 - o You can Disable the record by unchecking the Enabled field.
 - o Or you can enter yesterday's date in the To field.
 - o Or Both (Disable the record and enter yesterday's date in the To field).
- Make sure to save the record once you have made any changes.
- You are done.
